Alexander Bürkle head- quarters

A project that
enhances the
architecture through
Platek products
with original colour
notes.

LOCATION: Freiburg in Breisgau, Germany
YEAR: 2015

Platek was chosen as partner for the external lighting of the building and all the annexed warehouses by the Burgert group from Schallstadt, who coordinated the whole project. The Elektrogroßhandel Alexander Bürkle GmbH & Co. KG

logistics centre is located in Freiburg, Germany: it is an imposing four-storey building that houses the commercial and administrative offices of the company, a leader in providing technological services for construction.

In the section of the warehouses, the Tetra range was chosen in its many variations. For the loading docks, the entrance stairs and the access ramps for the

disabled, the wall-mounted version was chosen, with a diffused light that at the same time ensures optimal visibility.

The wall-mounted version was also chosen for the warehouses, this time with the role of perimeter light. Finally, for the facades of the warehouse, which extend

for 2,600 m², a choice was made for lighting that emphasized the rhythm given by the decorative gables.

In order to enhance the horizontal shutters, the wall shoulders above the main entrance and on the right side of the building have been illuminated by Tetra Corniche luminaires

equipped with RGB LEDs: the result is a dynamism of colours, linked to the corporate identity, which alternate at a slow pace, are very pleasant to the eye.
