

The city of Strasbourg

The city of Strasbourg

Luminous effects between history and culture

LOCATION: Strasbourg - France
YEAR: 2015
PROJECT: Ecotral - Berges de l'ill
Photographer - Patrice Bless

As the Latin-origin name “Strateburgus” (“city of streets”) suggests, Strasbourg is a nerve centre for Europe located halfway between the capitals cities Paris and Prague. Together with Brussels, Strasbourg is the seat of the European Parliament and of the Council of Europe and in the

past it was the residence of illustrious figures such as Gutenberg, Calvin, and Goethe, De Lisle, Pasteur and many others. The historical importance of the city and its evocative beauty have allowed Strasbourg to be recognized as a World Heritage Site by UNESCO.

It is precisely the historic centre of the city that Platek had the honour of lighting with its products by commission from Urban Community of Strasbourg. Along the banks of the River Ill, there are major architectural works lit by Platek: The Vauban Dam (Barrage Vauban or Grande Ecluse), Pont Saint

Madeleine and Pont Saint Martin, the Palais Rohan, and the Ancienne Douane (Old Customs Building). Micro Steel immersion floodlights seemed to be ideal for illuminating the architecture along the river front, and they can also be used out of the water as they are very resistant to humidity.

The luminous effect of Mini, in the recessed driveway and floodlight versions, combined with the Micro Spring and Spring floodlight, specifically intended for lighting monuments and large buildings, give the structure an adjustable and diffused light that is extremely picturesque. The

use of Mini Corniche in the applique version, combined with the Tetra 75 and 140 family, combined with Tetra Corniche 360, allows pleasant and well-balanced lighting. The final effect is very impressive and best enhances the architecture of the city.
