Crystal suite dream & charme

The glass house with a romantic atmosphere

LOCATION: Monferrato - Italy
YEAR: 2015
ARCHITECT: Piero Lissoni

An enchanted residence surrounded by greenery, with essential and clean lines: an oasis with the transparency of crystal. Crystal Suite is a project in which the lighting enhances the relationship between the architecture and the surrounding environment and creates an intimate and suggestive mood, in full respect of the design needs and totally in line with the Platek philosophy in terms of lighting design.

In this eco-sustainable project by Dream & Charme, Platek lights offer a magical atmosphere: each product is carefully selected to perfectly fit into the natural and living context, with the precise intention of enhancing the architecture of the Suite and creating a single environment in which interiors and exteriors follow one another without limits or interruptions.

The building perimeter is highlighted by NANO XL and MINI projectors, whose light beams give life to the vegetation surrounding it. The CHIODO stakes at different heights dot the entrance, while the ETEREA lanterns provide pleasant and soft light in the leisure areas, for moments of pure relaxation and conviviality. Also noteworthy is the presence of FLAMINGO floor lamps that illuminate the

various rooms of the terrace for relaxing evenings and summer dinners, depending on the needs, thanks to the easy mobility of the lamp. Finally, the grazing beams by ESAGONO discreetly accompany the paths, stops and pleasant evening walks around the residence, which becomes the perfect setting for a relaxing stay.
