Hotel Lagare, Mailand

Eine
tendenzschaffende
Architektur, die in
der italienischen
Hauptstadt
der Mode für
Aufmerksamkeit
sorgt

ORT: Mailand, Italien
JAHR: 2015

As part of the MGallery By Accor Hotels group, exclusivity was a fundamental prerogative for the Lagare Hotel in Milan:

Platek put itself at stake by developing a unique and completely tailor-made project.

A careful renovation has enabled the conversion of an old property into a design hotel with a contemporary style and spectacular views over the city. Combining the concepts of sustainability and maximum architectural enhancement, Platek customised the proposal and created new light fittings based on the client's design, for a total of around 2,500 pieces, finding innovative solutions for a high-performance scenario with maximum impact. The extreme versatility of

Platek's products in this project is shown at its best: element built in the ceiling, wall lights and decorative products furnish also the interior of the structure, playing the role of service light. Spring floodlights and One wall mounted luminaires were used to light stairs and access ways. One in the projector version, combined with Special and Mini Special, illuminates the terraces and rooftop, from which it is possible to admire the city skyline.

An innovative customised solution that Platek proposed at Lagare Hotel in Milan was the lighting of the windows that make up the façade. In fact, it was decided to propose the refined lighting with dynamic light, visually much more fulfilling than the single monochromatic LED. Remote control has been

applied to these products that illuminate the façade: the DMX system allows to light every single window in different colours, and can be switched on or off directly from the room. The final effect is spectacular. The imposing building lights up to become a multi-coloured chessboard.
