Hotel Laguna Materada, Croatia

Safety and relaxation for a family-friendly hotel

PLACE: Porec, Croatia

YEAR: 2015

LIGHTING DESIGNER: Bi lumen

ARCHITECT: Fearh – (Arch. Filip Kožaric e Arch. Emil Jelic)

The Laguna Materada Hotel project in Pore , Croatia is another example of Platek's great ability to meet the demands of the hotel industry. It is an

accommodation facility that operates in the international tourism sector and for this reason with specific requests regarding both aesthetic and functional aspects.

The main building includes reception, restaurant, rooms and suites that overlook the elegant solarium, accessed by a walkway through the greenery.

The requirements of the project were twofold: on the one hand, to ensure that guests could move around the structure in maximum safety and at the same time create a relaxing, welcoming and refined atmosphere.

For the entrances and access ways, Tetra mounted on a pole was chosen, ideal for providing functional lighting with a refined and elegant design. For walkways, green areas and relaxation areas, on the other hand, Moon bollards were particularly suitable, exploited in their three different heights to provide a unique three-dimensional lighting effect.

Platek products were chosen both for their high quality and for their characteristic of reducing energy

consumption to a minimum, a fundamental aspect in the lighting design of such an extensive structure.
