# Stacci Rural Resort

# A perfect balance between architecture and environment

LOCATION: Ragusa, Sicily  
YEAR: 2016  
COMMISSIONED BY: DMT 2 Servizi S.r.l.  
ARCHITECT: Giovanni Maiorana  
LIGHTING DESIGNER: Dott. Angelo Sanzone (IN SENSU)

Harmony and tradition are the keywords to describe the project Stacci Rural Resort, a tourist facility surrounded by the hills of Modica, in Sicily. In a natural setting of great naturalistic and

archeological interest like this the priority was to install the products that enhance the architectural shapes, by valorizing the surrounding environment.

The architect Giovanni Maiorana has executed a redevelopment and renovation project of an ancient farmhouse, keeping the original structure and matching it with the natural environment. The lighting designer Dr. Angelo Sanzone in collaboration with Platek has opted to choose products with a minimal, simple, with a high lighting performance design.

From the installation of MICRO full inox and SPY MEDIUM invisible when switched-off, but with a clear lighting effect, to the TRIS collection, elegant when switched-off and pure light when switched on. To complete the project MINI ONE and MINI SPECIAL applique, with pure geometric lines, used to light the facade as service lights.

The final effect is a comfortable lighting that can be spectacular, perfectly in harmony with the architecture and the surrounding environment.

# TECHNICAL SHEET

**MINI ONE**  
applique

indoor/outdoor

available sizes  
☒ 100x100x100 mm

available colours  
■ .06 grey  
■ .08 anthracite

**MINI SPECIAL**  
applique

indoor/outdoor

available sizes  
☒ 200x100x100 mm

available colours
