L'école de la musique

When light goes to the rhythm of music

PLACE: Saint - Cyr sur Loire, France

YEAR: 2016

The strength of the project for the music school in Saint-Cyr-sur-Loire is the complete RGBW LED system that making the installation

unique. The combination of colours turned out perfectly: a very difficult result to achieve by using radiant lighting equipment.

The products were carefully selected to appear imperceptible to the eye, but of great scenic effect once they are switched on. The recessed lights Grande, Mini, Tetra Corniche 360 and built-in Tetra 360 allow

an illumination capable of enhancing the architecture of the structure. Furthermore, on the perimeter of the building, Micro Spring projectors, also with RGB optics, were mounted on a pole.

For important events and celebrations, these products can create a wide variety of suggestive lighting scenes. Monitoring of performance is conducted remotely online.

In this innovative way, it is possible to achieve an emotional light that becomes a valid attraction for passers-by in Saint-Cyr-sur-Loire.
