BALINA

by Sara Moroni

Have fun with light: Balina evokes, rediscovers and restores the light-heartedness of child's play to form an elegant and sophisticated object.

A series of outdoor lamps with a strong decorative power and which add value to light-space interactions, and to the extraordinary textured and emotional effects of glass.

In 2006 she earned from the architect Carlotta De Bevilacqua, the actual vice-president of Artemide S.p.A., a Master Degree in "Industrial Product Design" with full marks and a specialization in Lighting at Politecnico di Milano.

After the degree she experienced as a project manager and then as a freelance, all these competences led her to face design with a multidisciplinary approach, the only way to create new ideas and innovative projects.

In 2015 she opened her own studio with the clear intention to focus on design and on strategic advice on product, furniture, interior, exhibit and lighting.

Today she collaborates with prestigious studios and important manufacturers. In her opinion design is the project and not the styling, ingenuity and not pure creativity.
